WEB LAYOUT MODULE

CONTENTS

This module has the following files:
1. MODULE_WEB_LAYOUT.doc
2. MODULE_WEB_LAYOUT_MEDIA.zip

Introduction

You are a freelancer working in the field of Web Technologies and you have been asked to develop the brand-new website for Indonesia's COVID-19 data. Your client has heard that you are good at building responsive website.

Description of project and tasks

The purpose of this website is to display the latest news about COVID-19 in Indonesia as well. A visitor can have a list of upcoming events. The purpose of this website is to provide information and news regarding COVID-19, from general news, socialization and urgency of conditions in Indonesia and to provide a list of upcoming events that can be followed for people who wish to participate. The target audience for this page is all elements of society in Indonesia. This can vary widely, therefore you will determine your interpretation of the target audience (based on "Indonesian society").

Page Requirements

In this module you are required to make a web layout in single page website according to the W3C consortium standards using HTML, CSS and Javascript. The web layout developed must be able to work optimally multiplatform on a desktop, tablet or mobile environment with the following specifications:

● Desktop: 1440px
● Table 768px
● Mobile: 320px
